PROFESSIONAL EXPERIENCE

Sandbox VR | Remote

Jul 2022 - Present

Advanced through four roles in under three years, from General Manager to Senior Global L&D Program Manager, based on results in store performance, new-store launches, and enterprise learning.

Senior Global Learning & Development Program Manager

Jan 2025 - Present

- Lead the global learning function for 90 corporate and franchise locations across North America, Europe, the Middle East, and Asia-Pacific, managing one Instructional Designer and enabling 37 store managers to apply consistent learning and launch-readiness standards.
- Own the end-to-end eLearning production pipeline from needs analysis through SCORM deployment, localization, and evaluation, producing a 54-module catalog in five languages that achieved a 96.7% first-attempt pass rate across 7,354 assessment attempts.
- Consolidated 5 siloed platforms into 3 governed systems and created 300+ knowledge resources, 200+ performance-support assets, and a Power BI readiness dashboard, giving cross-functional leaders a single source for go-live decisions.

Learning & Development Program Manager

Oct 2023 - Jan 2025

- Built the enterprise learning function from the ground up, establishing curriculum architecture, eLearning production, LMS administration, documentation standards, content governance, and program evaluation practices that enabled repeatable delivery across a rapidly expanding global footprint.
- Coordinated coach scheduling, travel, post-training evaluation, and stakeholder communication across corporate and franchise openings, delivering assigned learning support on time and keeping launch teams aligned throughout each opening cycle.
- Translated requirements from Operations, Deployment, store leaders, franchise leaders, and executives into scalable learning and performance-support systems, reducing reliance on one-off solutions and standardizing field execution.

Field Trainer

Jan 2023 - Oct 2023

- Built the company's first standardized new-store training and certification program and independently led 5 openings in 3 months, certifying on-site teams of 25+ and creating a repeatable launch model.
- Improved guest-experience execution across all 5 openings, which launched with exclusively five-star reviews - a company first that contributed to promotion into the L&D Program Manager role.

General Manager

Jul 2022 - Jan 2023

- Opened and operated a location with full P&L, staffing, and guest-experience accountability, ranking #1 company-wide in repeat visits, review score, and walk-in conversion.

GameStop | Colorado & Missouri

Apr 2015 - Jul 2022

District Manager / Store Manager Mentor / Store Manager / Assistant Manager

- Led 28 retail locations across two states with full multi-site P&L, staffing, training, and operational accountability; performance during the interim assignment resulted in promotion to District Manager within 8 months.
- Designed district-wide onboarding and coaching routines, developed leadership bench strength, and translated corporate systems and process changes into consistent store-level execution across 28 locations.
- Progressed through store leadership and was selected to develop new managers across the district; earned Prestige Certification, placing among the top 5% of Net Promoter Score performers company-wide.

TOOLS & DELIVERY

Technology: Power BI, Articulate Storyline, SCORM 1.2, Chatbase, ElevenLabs, DaVinci Resolve, Postgres, Python, Node.js, HTML/CSS, CI/CD automation, Google Workspace, Microsoft 365, and LMS administration.

Delivery: Delivered 10+ keynote and conference sessions for audiences of 100+, translating complex technical and operational content into practical guidance for leaders and frontline teams.

PROJECT HIGHLIGHTS

- **AI Knowledge System** - Architected a production-grade, 116-file governed knowledge system with human approval workflows, confidence gating, version control, audit history, Postgres, serverless functions, scheduled CI/CD automation, LLM orchestration, and a web reliability portal; each approved correction improves the governed source system rather than patching a single answer.
- **New-Store Readiness Transformation** - Reduced on-site training from 14 days to 5 (64%); supported 39 openings from Q3 2023 through Q1 2026, improved average readiness from 56 to 83.2 (+48.6%) across the first five portal-supported openings.
- **Global eLearning Catalog** - Built 54 modules in English, Spanish, German, Italian, and Arabic, achieving a 96.7% first-attempt pass rate across 7,354 assessment attempts and giving global teams consistent, localized training.
- **Distributed Training Network** - Established 8 certified training stores, 12 regional trainers and training leaders, and 8 Opening Support Coaches, creating scalable regional delivery capacity while the five-day model avoided an estimated \$56,000 in trainer lodging.
